

RE : Maxium Financial Services Inc.

Summit Credit Corporation specializes in providing financing solutions to small and medium sized businesses across Canada. We have been strategically partnered with Maxium for over two years, and during this time they have been 100% committed to our company's long-term success. Our offices are located within Maxium's offices, and everyone at Maxium makes our staff feel as though we are all part of the same team. This commitment and support comes from all staff and management at Maxium, and has been a key to our company's success.

Regardless of what challenges our company faces, Maxium supports and assists us as though we are part of their company. They always work with us to find solutions that are a win/win for everyone involved. Over the past two years, we have exceeded our bottom line targets, and we recognize that we would have not been able to achieve this without Maxium's financial support, and managerial expertise.

Personally, after working within their offices for over two years now, it is clear to me that Maxium's success originates with its people. In today's highly competitive financial services industry, it's refreshing to see that Maxium's "core values" focus upon the "quality of life" first and foremost. Maxium's people are committed to the company and its customers, and the company (management) is committed to its people and its customers as well. It truly is an inter-dependent and balanced relationship where everyone wins!

In everything that Maxium does, respect, equality, honesty, and integrity are the fundamentals which make the company so successful.

Yours truly,
